

Thomas Joyeux

hello@thomasjoyeux.dev | linkedin.com/in/thomas-joyeux | github.com/tomjoy75 | thomasjoyeux.dev | Paris, France

PROFESSIONAL SUMMARY

Developer training at Ecole 42 Paris (Bac+5 / RNCP level 7, in progress), with a solid grounding in backend, systems programming and infrastructure. Currently a fullstack Next.js / React intern at a startup, where I own the full delivery cycle from local to staging to production. Looking for a work-study contract from September 2026, and open to a junior permanent role. Available from 1 September 2026. Earlier career in music production and live performance: team coordination, logistics and operational delivery.

CORE COMPETENCIES

Backend & REST APIs

Systems programming in C

Docker & CI/CD delivery

Cloud infrastructure

Binary analysis & security

WORK EXPERIENCE

Serotonin May 2026 - September 2026

Fullstack Developer Intern

Paris, France

- Fullstack development on a Next.js / React application
- Built the staging environment and the release practice sitting between local development and production
- Designed and implemented a reverse-migration ledger so a destructive data migration could be replayed backwards - the undo, specified before the migration ran
- File-storage migration (Vercel Blob to Scaleway) for EU data residency and cost control: designed, validated on staging, and cut over to production
- Promoted a backlog of roughly 600 commits to production through that process - the first cutover runbook the project had
- Heavy use of AI assistants (Claude, Codex) in the development workflow

CarloProd 2018 - 2023

Production & Digital Tools Manager

France

- Team coordination, tour scheduling and management of digital tooling
- Operational ownership: approx. 40 events per year, approx. 100k EUR annual revenue

ViziloProd 2011 - 2018

Professional Musician

France & Europe

- Touring and concerts across France and Europe: teamwork, discipline, adaptability
- Stage experience, preparation and operational organisation

PROJECTS

ft-transcendence Backend

Multiplayer game backend with a secured REST API. Modular Node.js / Fastify backend across 5 domains (auth, profile, friends, tournaments, matches), JWT + 2FA access flow, SQLite persistence, 7 backend flows validated locally.

Node.js, Fastify, SQLite, JWT

inception DevOps

Dockerised web infrastructure: 3 core services, 5 with bonuses. NGINX, WordPress/PHP-FPM, MariaDB, plus Redis and Adminer. Persistent volumes and reproducible configuration via scripts.

Docker Compose, NGINX, MariaDB, Redis

minishell Low-level

Minimal Unix shell in C: command execution via fork, execve and waitpid. Owned word expansion across 4 kinds (variables, globbing, quote removal, IFS), correct exit codes and context-dependent signal handling.

C, Linux

binary-security Security

Binary analysis and vulnerability research on Linux: buffer overflows, format strings and exploitation reasoning across 39 levels.

GDB, Ghidra

EDUCATION

Bac+5 (RNCP level 7), in progress 42 Paris	2023 - present
Project-based learning, peer learning and pair programming. Common core completed (C, C++).	
Computer science course units CNAM Paris	2013 - 2016
Java programming, web development, databases.	
Music & applied arts ENSAAMA / Conservatoire	Earlier career
Design, applied arts and music.	

CERTIFICATIONS

AWS Certified AI Practitioner	AWS	2025
SQL Certificate	CS50	2025

AWARDS & HONORS

2nd prize, Open Data University - Cultur'Tour (873 views)	data.gouv.fr	2025
2nd of 2000, hackathon		

SKILLS

Languages: C, C++, Python, JavaScript, SQL, Bash, ASM
Frontend: React, Next.js
Backend: Node.js (Fastify), REST APIs, authentication, SQL
Tooling: Linux, Git/GitHub, Docker, Docker Compose, Redis, NGINX, GDB, Bash scripting
Cloud: AWS (AI Practitioner, 2025), Vercel, Scaleway
Security: JWT, 2FA, SQL injection, XSS, reverse engineering
Currently learning: Cloud, Kubernetes, Ansible
Spoken languages: French (native), English (B2)
